Hi everyone,

I'm looking for feedback on Ronn Kling's new book `_Power Graphics with IDL_`.

I've been to the web site, and looked at the table of contents, but I'm just a bit hesitant to drop the money with out touching the product.

I'd really like to hear how it improved or didn't improve your understanding of object graphics. So far I've just plugged away using `_Objects & Object Graphics_`. Which is so... Let's just say there is no author listed.

Thanks for the help.
