This should be a good idea - except there needs to be a feedback facility for discussion of problems with the contributed programs - since I can't find any such mechanism on the RSI site, I guess this newsgroup should suffice?

Mike

A new User Forum is now live on the RSI Web site: <http://www.rsinc.com/forum>

The forum is linked directly to the new RSI User-Contributed Library so that users can post and view threads that pertain to individual contributed files.
