Subject: Can IDL and MATLAB run together??

---

I have much expertise with MATLAB but am now working at an organization that uses IDL. Instead of recreating much of my MATLAB work, is there a way that I can have IDL scripts launch MATLAB scripts (and vice versa) and then have data sharing amongst them? I suppose this probably is not feasible, huh?

If this isn't possible, can anyone suggest anything or should I simply abandon hopes of continuing with MATLAB. Man I will miss the powerful array operators in MATLAB as well its cell arrays, etc...
