
Subject: copying of objects

Hi all,

how can I copy an object?

E.g.:

```
v0 = OBJ_NEW('IDLgrVolume')
```

```
v1 = v0
```

v1 only contains only a reference to v0, so I cannot use v0 and v1 in different model trees, which is what I need.

I was looking for something like

```
v1 = OBJ_NEW( v0 ),
```

 but this doesn't work.

Any ideas?

Thanks a lot,

Sebastian
