Subject: Question on SLICER widget Posted by dpal on Fri, 17 Jun 1994 23:27:29 GMT

Hello everybody:

I am trying to use SLICER for volume visualization. I have a 22 X 22 X 22 array containing temperature data. I am using the following code to read the data.

COMMON VOLUME_DATA, vol OPENR, 1, "head.dat" VOL = FLTARR(22, 22, 22) READU, 1, VOL CLOSE, 1 SLICER

When I am trying to look at a slice of this data from the SLICER widget, it is drawing totally arbitrary contour lines. Using the probe command, I tried to look at the values at various points on that slice, but it is showing completely arbitrary numbers.

Can anyone tell me what is going wrong?

Thank you Deb
