Hi all,

thats fantastic if I use gzip on my linux to compress files I can read
them by open and /compress directly.

Did someone know what's windows did in this case?

regards

Reimar

Yes I know this but did someone tried.

Because sometimes fstat don't tell with the compress tag that's the file is compressed. But it surely is.

So I am testing the extension too. But this is not the best way.

regards

Reimar
