Hi,

I am having trouble with the IDL5.5 avi driver from kilvarock under
WinXP Pro service pack 1. In this setting, the avi driver can not read
the avi files which can be read under Win98SE, or WinXP Home(not sp1),
also IDL5.5.

Here is the error message:

% Loaded DLM: IDL_AVI.
% AVI_OPENR: Unable to get frames at all

Is there a solution to this? Thank you.
