Hello!

I'm new to IDL and I'm learning fundamental techniques.

If I have a set of point with coordinates (x, y, z) how can I plot a 3D cube representing them?

I have tried surface command, but it is just to plot function, I guess

...

I thank everyone can give me some hint or help.

Bye!

Anto

I also heard that there is PLOT_3DBOX routine. Not too fancy but may work in many cases.

HTH,

Pavel
