There are probably several ways to do this. Here is
a way I often use:

```
  OpenR, lun, filename, /Get_Lun
  info = FStat(lun)
  Print, info.size
```

Cheers,

David

Through the throbbing headache, I recall that in 5.5 there is a
FILE_INFO that gives all that information without having to open the
file. Thanks Jim P. for reminding me of that! Now I can pretend I know
something :-)
Cheers,
Pavel

Ah, right. I was looking for that this morning, too.

Cheers,

David

P.S. Let's just say I hope IDL 5.6 has its own help
file. :-)
