
Subject: How to I get IDL postscript files from Sun to Mac

We are running IDL on a Sparc10 Sun Workstation and have created some really nice color post-script files. The problem is that our customer wants to include them in a report on a MacIntosh. We can't seem to get the ps files across correctly.

FTPing them (even in binary mode) doesn't seem to work to the Mac.
Is there some trick to getting these files over?

Thanks for any help,

Mike Bacigalupi
