
Subject: Upgraded to IDL 5.6, now having problem w/ linkimage

Folks,

We upgraded from IDL 5.3 to IDL 5.6 and use several functions from a shared object file. We use LINKIMGAE to tell IDL about the functions from the shared object file. With IDL 5.3, everything worked. Now we are getting a core dump with IDL 5.6. Has LINKIMAGE changed in any way between 5.3 and 5.6?

Thanks.

K. Banerjee
