Subject: Fullscreen Object graphics ?
Posted by george on Wed, 19 Mar 2003 13:59:31 GMT

Hi there,

Does anyone know how to get graphics to display in a 'fullscreen' mode
?
I am using 5.6 for OSX and i wish to have just graphics sent to the
projector - rather than graphics surounded by an x-window.

I assume this must be possible ?

Cheers,

George.
