Hi there,

using a quite complex GUIBuilder-built UI, (working fine),
I repeatedly get the error message

"menu item skipped a level"

after editing the Menu (even if unchanged) and pressing the ok-Button in the
Builder.

Is this a known Bug, or is there anything I made wrong?

Thanks
Harro

Hi,

Perhaps it's time to try support@rsinc.com, and get some value for all the Maintenance money you pay...

I imagine not to many people use the GUI Builder, especially for big projects - most people cut their own GUI's, and thus aren't in any position to assist you - hence the lack of answers...

Vielen Glueck,

Andrew
