Hey guys,

just upgraded from IDL 5.4 to 5.6..and some of my old idl progs now
won't compile anymore because of some "syntax error"....

```
product=product(*,*,0)/100.  
      ^
```

% Syntax error.

```
product(WHERE(PRODUCT NE nodata))=product(WHERE(PRODUCT NE nodata))+273.15  
      ^
```

% Syntax error.

```
product(WHERE(PRODUCT EQ nodata))=!VALUES.F_NAN  
      ^
```

% Syntax error.

```
subsetprod=product(minlonpos:maxlonpos,maxlatpos:minlatpos)  
              ^
```

% Syntax error.

Ain't this strange?, I'm working with
Red Hat Linux release 9 (Shrike)
Kernel 2.4.20-8 on an i686

Cheers
