Hi all -

In my haste last week to put the FAQ together before I left on a short trip to Texas, I didn't check everything as well as I should have. Anyway, thanks to Bill Thompson for straightening me out. The only changes are to question T18 (How can I vectorize an equation of two different arrays?), so no need to grab the new one unless this pertains to you. The new FAQ is at eos.crseo.ucsb.edu in the pub/idl directory.
