---

Hi,

I create this procedure

```
PRO open_lang,path,fitxer_catalog
  oMsgCat=MSG_CAT_OPEN(",FILENAME=path+fitxer_catalog)
END
```

and I call with the next command

```
>open_lang,'/lang/','msg.cat'
>help,/heap
help,/heap
Heap Variables:
  # Pointer: 0
  # Object : 1
```

```
<ObjHeapVar19> STRUCT  = -> IDLFFLANGUAGECAT Array[1]
```

How can I acces to this object heap variable?.

Regards
