Hi All.

I was looking for a plot routine to zoom in and out in plots, and found the
MPI_PLOT routine. This seems a good routine. Unfortunately, when I press the
'modify plot' button, the widgets that control the X-axis properties don't
appear, just an empty rectangle. The Y-axis control widgets appear just
fine.

Does anybody know what's wrong?

I use IDL-5.5 for linux. (1280 x 1024 x 24-bit). If you need more info,
please let me know.

Regards, Pepijn Kenter.
