I'm thinking a few of these problem could be solved just a bit more quickly by a little more structured approach to your programming style. :-)

Cheers,

David

i was hoping that 2. do u have any comments on how i can improve the structure of the code snippet that i have written? if u are thinking abt my variable naming- i have named them corresponding to some variable names written in fortran for a canopy model. i thought they seemed nice- the way that i had named them that is, but apparently even that landed me in a lot of trouble. any comments ?

thanks

m
