Hi all,

I get the following error when i compile the code in this segment :

```
"
m = {mcr, name:'kuusk2', leafOpticsModel2:'prospect', nComponents2:4, $
  L2:0, sl2:0.15, clz2:1.0, eln2:2.0, thm2:35.0, slw2:90.0, nCoef2:0.9, $

Dear Andy

I opened as you are suggested. I past the all command here. Please see it. Thank you
IDL> startup

% End of file encountered before end of program.

At: C:\Users\fadaei\IDLWorkspace80\IDL\bowman\startup.pro, Line 36

% 1 Compilation error(s) in module \$MAIN\$.

% End of file encountered before end of program.

At: C:\Program Files (x86)\ITT\IDL\bowman\startup.pro, Line 36

% Compiled module: STARTUP.

% Attempt to call undefined procedure/function: 'STARTUP'.

% Error occurred at: \$MAIN\$ 1 C:\Users\fadaei\IDLWorkspace80\IDL\bowman\startup.pro

% Execution halted at: \$MAIN\$ 1

C:\Users\fadaei\IDLWorkspace80\IDL\bowman\startup.pro

IDL>

Regards, Hadi

Hi,

I meant you should post the contents of the file

C:\Users\fadaei\IDLWorkspace80\IDL\bowman\startup.pro , as that seems to be what is causing the error, and without seeing the code we can't see why it is causing an error. From this message, it might just be you need to add an 'end' at the end.

Hope this helps,

Andy

Getting started with a new computer system is always the hardest part.
My best advice is to try to find someone local who can help. If there is
no one you can ask, you can post questions here, but try to be as specific,
clear, and detailed as possible.

Best of luck,

Ken Bowman

Dear Bowman
Thank you so much for your advice.
Best, Hadi
