Dear all,

we found a special bug in contour.

We can't explain where the 1.3 at the yaxis comes from.

This happens only by /fill not by fill=0 and not by /cell_fill.

The value is alog10 of yrange[0]. If you change the yrange starting at 40 then it is 1.6

I have informed CREASO too.

regards

Reimar

```
pro test_contour
```

```
erase
```

```
x=findgen(100)
```

```
y=findgen(100)/99.*70+20
```

```
z=findgen(100,100)
```

```
init_plot2d={max_value:9999.10,$  
             min_value:-1.00000e-06,$  
             xrange:[0,99.0],$  
             yrange:[20,90.0],$  
             zrange:[-1.0000000e-06,9999.10],$  
             position:[0.202020, 0.238095, 0.727273, $
