I think there must be some kind of detrimental interaction going on between the CENTRAL_AZIMUTH keyword on the MAP_SET command and the MAP_PATCH routine. If you leave CENTRAL_AZIMUTH off, or use MAP_IMAGE instead of MAP_PATCH, things appear to work correctly.

I think this is a bug that should be reported.

Cheers.

David

David,

> use MAP_IMAGE instead of MAP_PATCH

Thanks a lot for the tip, I ended up using MAP_IMAGE as a workaround for that particular projection.

> I think this is a bug that should be reported.

So do I, but I couldn't find any bug-report pages on RSI's website. Should I just e-mail technical support, or is there another way that I'm not aware of?

Thanks again!

I would just send an e-mail to support@rsinc.com.

Cheers,

David
