Subject : NCAR cgm and PV-WAVE

Has anyone out there figured out a way to read an NCAR graphics CGM file into PV-WAVE ?, or else to use NCAR graphics (v.3.0) CTRANS > to display a PV-WAVE produced CGM file.

The issue is to combine a PV-WAVE image with a graphic overlay (geographic, boundaries, grid etc).

In this context, has anyone written PV-WAVE, IDL utilities that display geographic data, (eg, CIA World Data Bank) data.

Thanks Axel
