Subject: determing object type at runtime in IDL Posted by reger on Wed, 29 Oct 2003 22:55:27 GMT

View Forum Message <> Reply to Message

Is there a way to determine the type of object something is at runtime? For example, if an object x is an IDLgrView or IDLgrModel object. SIZE doesn't help as far as I can tell because it will only tell you it's an OBJREF.

Thanks, Rob Eger Tech-X Corp. Boulder, CO
