Folks,

Ever felt like you were missing out on the latest
IDL tips and programs? Want to be the first on your
block to know how to do something new in IDL?

Well, your prayers are answered!

Thanks to Reimar Bauer, who has pushed me screaming
and shouting into the glitz of new technology and
instant communication, you can now get automatic
updates of Coyote's Guide to IDL Programming. Just
point your RSS/RDF NewsTicker to:

   http://www.dfanning.com/coyote.rdf

Now YOU can be the first to know what's going on!!!

Cheers,

David

P.S. I guess Reimar uses the knewsticker program
that came with his Linux kde environment. I just
downloaded a beerware program named RSSNewsTicker
from http://www.rssnewsticker.com/ for my Windows
machine and it works great. How did I ever live
without this!? :-)
