Hi,

Does any one know how to setup a Truetype font that does not look like crap
on the screen? I tried

```
!p.font=1
device,set_font='Helvetica',/tt_font
window,0,xsize=300,ysize=300
xyouts,0.5,0.5,'Hello World',/normal,charsize=5
```

but the results are so lousy that even Hershey looks better.

Thanks for helping,

Haje
