Subject: Pixels per Inch

View Forum Message <> Reply to Message

Good morning,

I have created a PNG image using the "write_png" routine. I have
subsequently been asked to increase the resolution of this image from
96 pixels per inch to 300 pixels per inch, how can I do this ?

I would be very grateful if someone could point our to me how to
determine the resolution of a PNG image, and how to vary it (if
possible) ?

Thanks in advance for the help.

Best Regards,
Pepe
