Folks,

Anyone has experience with dialte function? I have no idea what it is about after reading the online documentation of this function. You can kindly either give me detailed explanation on what its purpose is or shed some intuitive insight on this function.

-TL

Hi,

I found this tutorial that includes the morphological operators Dilate,
Erode and much more!

Cheers,

Now that just wasn't nice... telling you I found it, but not *where*!

Sorry about that:

http://www.cis.rit.edu/class/simg782/lectures/lecture_03/lec_782_03_03.pdf

or if this is easier for you:

<http://tinyurl.com/yczc>

Man, that TinyURL is handy!

Cheers,

Subject: Re: About 'dilate'

Sometimes a look to the concurrency is helpful.
<http://www.mmorph.com/>

Regards
