Dear Mike

we are using this tool to set up our colortables.

http://www.fz-juelich.de/icg/icg-i/idl_icglib/idl_source/idl_html/dbase/x_def_colortable_dbase.pro.html

The output of the widget is a routine with header and an example image like:

```
pro ct_miklos,start_color=start_color,max_colors=max_colors,colors=colors

colors=[[7,255,128,128,250],$
        [0,50,128,255,255],$
        [0,50,255,128,255]]
def_colorsystem,colors=colors,start_color=start_color,max_colors=max_colors
end
```

For further routines and licensing please have a look at

http://www.fz-juelich.de/icg/icg-i/idl_icglib/idl_lib_intro.html

best regards

Reimar
