Subject: envi_avhrr_warp_doit: How to set corners of the warped image?
Posted by wl2776 on Wed, 07 Apr 2004 07:34:31 GMT

After performing this routine I have the warped image in a projection,
but its corners are not visible because they are left outside.

How to make the area of the warped image a bit greater in order to see
image corners?

Thank you!
