I am not sure if I understand right your request.
Do you like to have a printout on the logwindow?

If data is type of string

```
printtab,sindgen(2,10)
% Compiled module: PRINTTAB.
    0      1
    2      3
    4      5
    6      7
    8      9
   10     11
   12     13
   14     15
   16     17
   18     19
```

Type casting if it is not string by n2s.

```
printtab,n2s(findgen(2,10))
% Compiled module: N2S.
% Compiled module: IS_STRUCTURE.
0.00000 1.00000
2.00000 3.00000
4.00000 5.00000
6.00000 7.00000
8.00000 9.00000
10.0000 11.0000
12.0000 13.0000
14.0000 15.0000
16.0000 17.0000
18.0000 19.0000
```

You find the routines in our library
http://www.fz-juelich.de/icg/icg-i/idl_icglib/idl_lib_intro.html

regards

Reimar
