Dear all,

I don't know if you use already wikis. If so may be this extension is interesting.

With the DataLanguage Processor you could execute idl and compatible code on the wiki engine MoinMoin.

e.g.: a simple plot

```
{{{#!DataLanguage
```

```
a=[1,2,3,4,5,1,5,5]  
b=[12,12,13,44,8,1,5,20]
```

```
plot,a,b,title='Title',xtitle='X title',ytitle='Y title'
```

```
}}}
```

cheers
