Subject: HASHTABLE class available Posted by Craig Markwardt on Mon, 19 Apr 2004 20:27:22 GMT View Forum Message <> Reply to Message

Greetings--

For those people who inquired about the HASHTABLE class that I mentioned previously (which actually was zero people), I put it on my web page if you are interested.

Hash table keys can be any scalar string, and as I mentioned before, it's reasonably fast (12 khashes / sec for 30 character strings). Hash table values can be any IDL data type, including arrays (or I suppose, another hash table!).
