I want to transform a 1-dim array to a 2-dim array. How can I do this very quickly without loops?

Example:

a=BYTARR(1284640)

b=BYTARR(1147,1120)

k=0

FOR i = 0, 1147-1 DO BEGIN

FOR j = 0, 1120-1 DO BEGIN

b[i, j] = a[k]

k=k+1

ENDFOR

ENDFOR
