Does any one have an algorithm to unpack this vector

$v0 = [0\ 1\ 2\ 3\ 0\ 4\ 5\ 1\ 0\ 2\ 3\ 4\ 0\ 5\ 1\ 2\ 0\ 3\ 4\ 5]$

in the following way:

$v1 = [0\ 0\ 0\ 0\ 0]$

$v2 = [1\ 2\ 3\ 4\ 5\ 1\ 2\ 3\ 4\ 5\ 1\ 2\ 3\ 4\ 5]$

Thanks,

Tmorri
