## Subject: Convert String to Hexadecimal Number Posted by David Fanning on Tue, 11 May 2004 22:36:30 GMT

View Forum Message <> Reply to Message

Folks,

I guess I could figure this out, eventually, but it has already been a long day, and it's getting longer...

Suppose I have a string, 'e4f3', representing a hexadecimal number. Does anyone have a good algorithm for converting this to a decimal number? (I mean without having to remember any of that 8th grade base8, base16 nonsense.)

Cheers,

David
