
Subject: ENUMLIST in IDLitComponent::RegisterProperty

Hi,

I have a quick question.

Has anybody come up with a way to give an ENUMLIST property an initial value which is NOT zero? E.g. if:

```
LIST=['Tom','Dick','Harry']
self -> IDLitComponent::RegisterProperty, 'PEOPLE', $
      ENUMLIST=LIST, $
      NAME='Friends'
```

The default setting will be 'Tom'. Is it possible to change the DEFAULT setting, without changing the order of LIST?

Thanks,
Sean
