Subject: Moving, Copying, Renaming Files using IDL
Posted by i-kant on Fri, 04 Jun 2004 22:34:09 GMT

I'm using IDL 5.5.

After consulting Help files, I learned that you can create and delete
files. You can also make new directories. However, does anyone know
how to move, copy, and and rename files in IDL? Is there some pre-made
procedure/function I could use?

Thanks,

Edwin
