Thanks Rick,

so, how do i get it to work exactly?

In my prototype code, the sav file running in vm hangs up at the call
to the function in the dlm. (running on the same computer)

I did the usual steps

> .comp avi_builder

> resolve_all

> save,filename='avi_builder',\routines

In fact, I even tried running the code (which works fine), then
doing the resolve_all then save, and still it doesn't work.

What step did I miss?

Cheers,

bob
