Well I was going to point you to Ben Tupper's site where there exists a
tool to do something along those lines, but the link I have for it doesn't
go where I think it should (ie, not to Ben's site). I imagine, however
that he'll chime in with the correct answer.

Hi,

Yes the web pages are gone; used for a higher purpose now. But you can email me
directly and I'll send you the IDL/MATLab files. Be advised, these only work
for fairly simple forms of data.

Ben
