Dear all

I wonder what I am doing wrong. I like to copy some examples e.g. from plot by copy and paste on my linux box from the pdf help to idlde.

I marked it with the text select box key and inserted it into idlde. It is still there but in one line. Where are the linebreaks gone?

In the past this has worked. May be there is a configuration I missed in acroread5.08.

Tips?

Reimar

There was an earlier thread on this <http://tinyurl.com/9gz3d46>
e.g. setting it in the IDL preferences, or in an environment variable
`export IDL_ONLINE_HELP_HTML_BROWSER=firefox`

I just bookmark it in Firefox, and never launch help from IDL but go directly from the browser.
