Hello:

please tell me if the dataminer doc is enough to trouble-shoot connectivity.

While i get connected to the db using dialog\_dbconnect(), if i try to create a record set further, it gives me ODBC syntax error in FROM clause. I am clueless about this.im stuck. Can anybody suggest something?

Pravesh

You can try the SQL clause in your database environment (say, MySQL, Oracle) first. Different DB software requires varied syntax, although they look almost the same.

Tian.
