Subject: Fixing ragged edges in shade\_surf PS output Posted by Paul Van Delst[1] on Wed, 15 Dec 2004 15:52:25 GMT

Hello,

I just output a shade\_surf image -- which looked terrif onscreen -- to a PS file. The PS display shows the edges of the surface as really ragged. I expect some of that, but I also expect the PS output to be as good as the screen display. Is there any way to "fix" this? Some setting of the device keyword maybe? I'd like a direct graphics solution too if anyone has one. I reproduced the same plot in iSurface but ... well, suffice it to say my patience wears thin a lot faster than it used to.

Thanks for any hints,

paulv
