The hexadecimal color code doesn't work. The PS device is an 8-bit device. You will have to load a red color in a color table and access it with an index number. However, this will work everywhere:

```
Plot, data, Color=FSC_Color('red')
```

Cheers,

David

P.S. You can find FSC_Color here:

http://www.dfanning.com/programs/fsc_color.pro

Thanks Dave,
You aer always a good source of help for IDL.

Regards,

Andry

Well, it is the community service part of a sentencing program. :-)

Cheers,

David

Must be that PWI conviction. You shouldn't take your laptop to the
Expert Programmers Association meetings.

Ken

Tell me about it! I *swear* she told me she was 18!

Cheers,

David
