"spawn, tmp_path /NOSHELL"

Miss a comma?

If your EXE is a windows GUI program, SPAWN can call it without showing
the command window when supplied with /NOSHELL keyword. But, if you
want to run DOS command, use HIDE keyword can bring the command window
to back, while it will still show in the task bar.

Marco,
try /hide instead of /noshell to start the console minimized. Read the help

for more detail...
