Thank you Oleg!

I have been using and pimping your original code in Ronn's IDL2AVI dlm for a long time and one of these days I was going to add some of these features. But then you have come along and done it for me. And added so much more!

Very nice work.

Oleg,
wow, this is great. I had been looking into Ronn's code, too, but then realized that my Vfw knowlegde was too limited to do these mods without doing a significant amount of reading. Do you share the source code for the DLM? If so, I would not mind getting a copy of it!

Thanks,
Haje
