case x of 0: do_this() 1: do_that(x) 2: do_that(x) 3: do_that(x) 4: do_that(x) 5: do_that(x) 6: do_that(x) 7: do_that(x) 8: do_that(x) 9: do_that(x) 10: do_something_else() 11: do_something_more() endswitch

Is there a way to group 1 - 9 into a single expression rather than having to list each distinct number in the range?

-Mike
