Hi Ken,

I looked for similar code a few months back but didn't find anything that I could use natively in IDL. There are a couple of matlab toolboxes that may be of some use:

<http://mole.imm.dtu.dk/toolbox/>

<http://www.cis.hut.fi/projects/ica/imageica/>

<http://www.cis.hut.fi/projects/ica/fastica/>

There is also some python code:

<http://mdp-toolkit.sourceforge.net/>

Cheers,
Randall
