Hi all,

I have an ascii file, from this I calculate an 3d array of size
(36,44,32)

I would save this array (d) and recall him after from another project.

I writed:

```
save, filename='xxx.sav'
```

but when I recall with restore:

```
restore, 'xxx.sav'
```

the size of my file is 0, not 3!!!!

Where am I wrong?

Thanks

Regards
