I have updated the interactive image processing tool IQM. The newest version is now IQM1.12. There are new features such as BioRad images support, Histogram plot, Correlation Plot, Fractal dimension by FFT and new options.

If you are interested, look at the history link (for the update news) or at the tutorial link (for a complete description of IQM) at:

<http://www.uni-graz.at/people/ahammer/IQM/index.htm>

If you write me an e-mail I will forward you the download password.

Best Regards,
Helmut Ahammer
