Some limit, polat, and polon settings for map_set under IDL3.6.1 cause errors in the displayed map projection. These errors did not occur in IDL3.1.0. Is there a fix available for this problem?

example:

```
;The following statement does not work correctly in IDL3.6.1  
map_set, -36.6, 99.6, /orth, /grid
```

```
;The following statement does work correctly in IDL3.6.1  
map_set, -36.6, 99.8, /orth, /grid
```

```
;The only difference is the polon value.
```
